

- The fill depth shown on this plan is for fill placed during construction of the subdivision while the site is under the control of Beveridge Williams and Co Pty Ltd. Beveridge Williams and Co Pty Ltd has no further knowledge or records of any other filling works throughout this subdivision.
- Fill less than 200mm in depth is not shown on this plan.
- The depth of fill can be determined by calculating the depth between:
 - the existing surface surveyed by Bortoli Wellington Pty Ltd undertaken October 2010; and
 - the proposed design surface shown on the allotments on this plan.
- The fill depths shown do not take into consideration any breaching, grubbing and removal of topsoil which may occur prior to filling of the land.
- During the subdivision construction excavation works within the easements shown on this plan may be undertaken for the purposes of laying drainage, electrical, telecommunications, water and sewer main infrastructure.
- Fill in reserves is not shown.
- This plan should be read in conjunction with the plan of subdivision.
- Where shown on drawings, topsoil will be stripped from lots as part of the construction activity and replaced with fill to meet finished surface levels. Where obstructions such as trees and rocks are removed will be placed back to meet the finished surface levels. Where the fill is greater than 200mm in depth structural fill complying with Section 4 AS3798-2007 will be used.

WARNING
BEWARE OF UNDERGROUND SERVICES
 The locations of underground services are approximate only and their exact position should be proven on site. No guarantee is given that all existing services are shown. Locate all underground services before commencement of works.
